

Out of Stock Subscription:

When a product is out of stock, the customer be able to request notification of availability by entering an email address on the product detail page. The subscribers will be notified by email when the product will be back in stock.

For example, one of your products goes out of stock, in the product info page customer can see one new form that will allow to subscribe for newsletter. When the product quantity will be changed, the customer will receive an email that will inform him that product is ready for ordering.

Also admin can see the list of subscribers at Magento backend, and could delete any subscriber from the list. Product wise filtering allows to see which product is most subscribed by your customers. You can change the product stock notification email template from backend. And also allow to enable/disable the product out of stock subscription form at frontend product page.

The screenshot displays the Magento Admin Panel interface. At the top, the header includes the Magento logo, 'Admin Panel' text, a 'Global Record Search' bar, and user information: 'Logged in as nimda | Friday, October 28, 2016 | Log Out'. Below the header is a navigation menu with tabs: Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, Webcreta, CMS, Top Menu, Reports, System (active), and Subscribers. A message banner below the menu states: 'Latest Message: Dirty COW Linux OS Vulnerability - 10/25/2016 Read details' and 'You have 15 critical, 6 major, 18 minor and 119 notice unread message(s). Go to messages inbox'. The left sidebar shows the 'Configuration' menu with categories: WEBCRETA, GENERAL, and CATALOG. The 'Out of Stock Subscription' option is highlighted under the CATALOG section. The main content area is titled 'Out of Stock Subscription' and features a 'Save Config' button. The configuration table has two rows: 'Enabled' set to 'Yes' and 'Email Template' set to 'Default Template from Locale', both with '[STORE VIEW]' links.

Out of Stock Subscription	
Enabled	Yes [STORE VIEW]
Email Template	Default Template from Locale [STORE VIEW]

Features:

- Allow the customer to subscribe for out of stock product.
- Send emails to subscribed customers when product is back in stock.
- Admin can see the list of subscribed customers, and can filter the subscribers product wise at Magento backend.

- Admin can delete the customer from the subscription list.
- Allow to set/change product stock notification email template.

Installation

Backup your data

Backup the database and your store's web directory.

Disable Compilation

In the Magento admin panel, go to System->Tools->Compilation. In case "Compiler Status" is "Enabled", click on the "Disable" button (in case the status is disabled you can skip this step):

Download and Extract

Download and extract (unzip) the extension's contents on your computer. Navigate inside the extracted folder.

Upload files

Using a FTP client, upload the content of the extension directory to the store's document root, so that the app directory in the extension folder overwrites the app directory on the server. If asked to replace any files, select "Yes".

Clear the cache

In the Magento admin panel, go to System->Cache Management and press the "Flush Magento Cache" button:

Configuration

Please refer readme.html file in the extension for detailed configuration

Troubleshooting

When I try to access your extension's configuration at System->Configuration->CATALOG->Out of Stock Subscription, I get a 404 error
Logout & Login back into the Magento admin panel.
